

Peach State Capital Company (PSC)

Digital Capital Infrastructure Whitepaper

Peach State Capital Company is a digital capital and infrastructure firm focused on designing structured, automated income systems. The company develops scalable monetization frameworks and AI-driven automation designed for long-term operational control and predictable digital revenue systems. The PSC token acts as the utility layer within the Peach State ecosystem, supporting access to automation infrastructure, digital asset services, and future Web3 financial tooling.

Mission

The mission of Peach State Capital Company is to transform digital income from a tactical activity into engineered infrastructure. By combining automation systems, monetization architecture, and disciplined capital design, Peach State aims to build reliable digital income frameworks for modern operators and businesses.

The A.C.E. Protocol™

The A.C.E. Protocol™ is the proprietary framework developed by Peach State Capital to install automated digital income systems. Rather than focusing on scattered online tactics, the A.C.E. Protocol™ structures digital income through three phases:

Phase	Purpose	Outcome
Architecture	Define the monetization model, niche positioning, and offer structure	Ar started digital income system
Capitalization	Engineer pricing strategy, funnels, and revenue capture logic	logie ntional revenue design
Execution Automation	Deploy AI automation, payment systems, and delivery infrastructure	Scalable automated operations

PSC Token Utility

PSC functions as the operational token within the Peach State Capital ecosystem. Utility includes:

- Access to A.C.E. Protocol™ infrastructure tools and automation frameworks
- Payment for digital infrastructure services and advisory programs
- Participation in ecosystem development initiatives
- Future integration with Web3 financial infrastructure and digital asset systems

Token Information

Token Name	Peach State Capital Company
Symbol	PSC
Network	BNB Smart Chain
Standard	ERC20 compatible (BEP20)
Contract Address	0x60606ecc6af005a2966fc5bc38b34435293b9abd
Total Supply	1,000,000,000 PSC

Ecosystem Vision

Peach State Capital Company is building an ecosystem centered on automated digital infrastructure. Future developments include AI-driven monetization tools, digital asset management frameworks, and structured revenue systems designed to operate with minimal manual intervention. The PSC token acts as the coordination layer across these systems, enabling participation, access, and infrastructure activation within the ecosystem.

Risk Disclosure

PSC is designed as a utility token within the Peach State Capital ecosystem. It is not intended to represent ownership, equity, or profit-sharing in Peach State Capital Company. Digital assets involve risk and market volatility, and users should evaluate their participation carefully.
